Add Edit eXit

A new list view has been introduced when initially launching Services or Inventory items. This screen allows you to directly add a new item, or edit an existing one, with a few key fields available. A 'View' button at the end of each line will load the traditional Services and Inventory items screens you are used to. These screens contain the full array of options available to Services and Inventory. They have been streamlined for ease of use.

NECK ROLLS	1
WEDGES	1

A new option in Inventory and Services allows you to assign particular items as Packages. This allows you to group multiple services or multiple inventory under one item. This one item can then be charged as usual via Patient Transactions, special services, VTC, etc.

When entering patient transactions, each item the package contains is rendered in the transaction.
