Please Read the following carefully before signing.

Chiropractic care, like all forms of health care, holds certain risks.

While the risk are most often very minimal, in rare cases, complications such as sprain/strain injuries, irritation of a disc condition, very rare occurrence of fractures, and possible stroke, which occurs at a rate between one instance per one million to one per two million. The latest research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke.

After careful consideration of the benefits, risks, and alternatives to chiropractic, I do hereby consent to examination and treatment by any means, method, and or techniques, the doctor deems necessary to treat my condition at any time throughout the entire clinical course of my care.

In the instance that x-rays are deemed necessary, I understand that I should alert the doctor if there is a possibility that I may be, or am, pregnant.
